SUMMARY OF INFORMATION

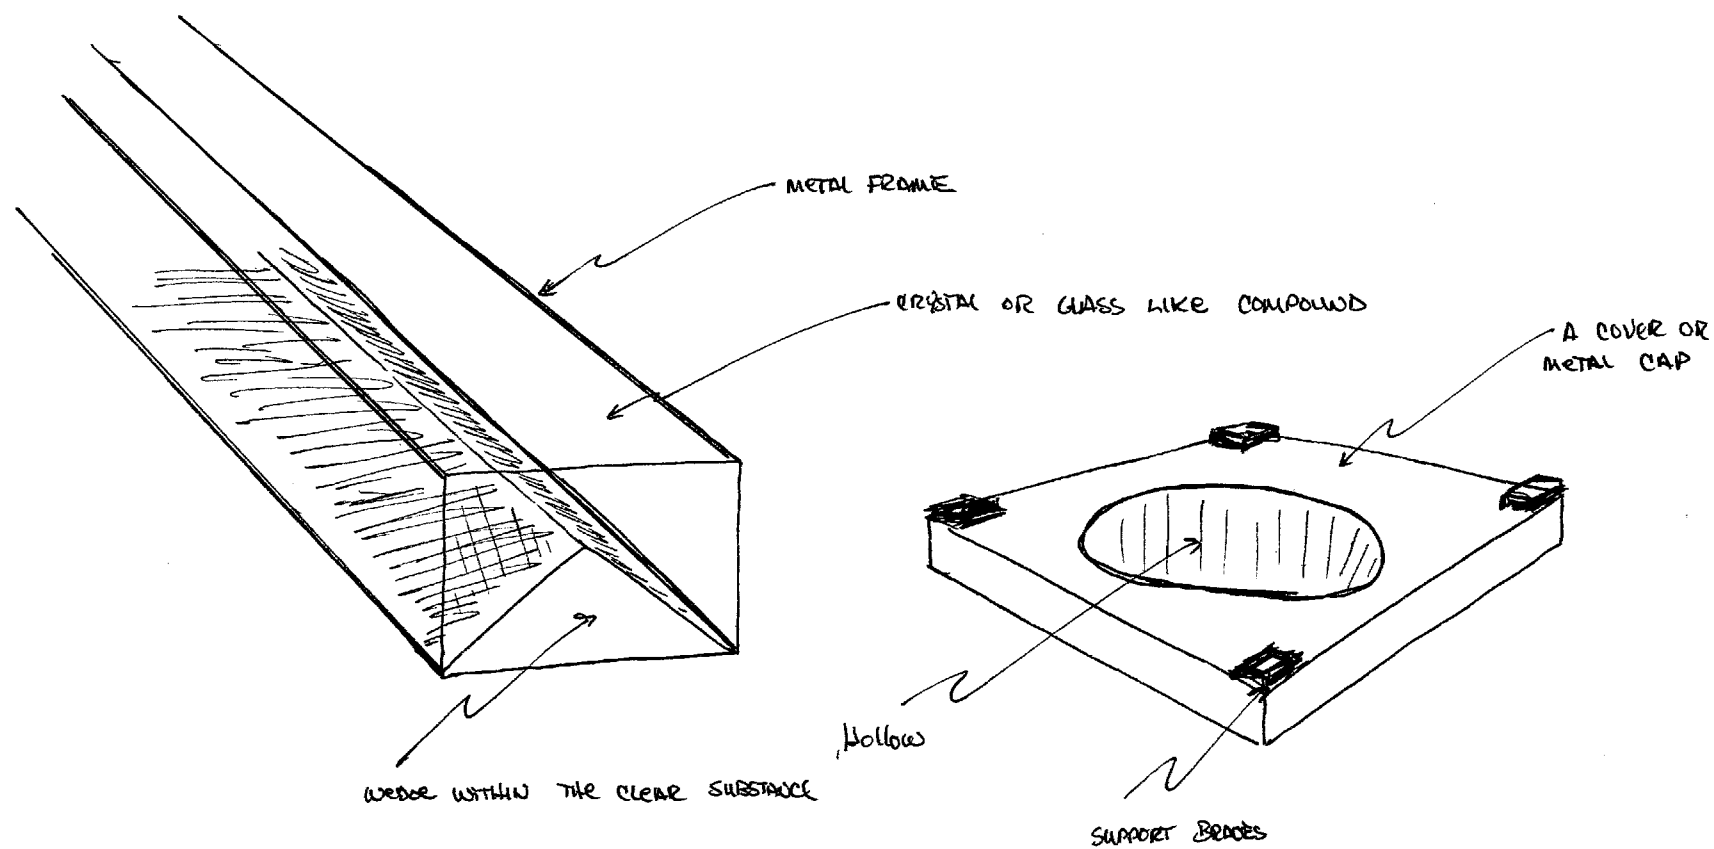

I was drawn to an object that was constructed of clear glass or acrylic materials. These clear materials surrounded or encased a wedge shaped object within a framework of metal.

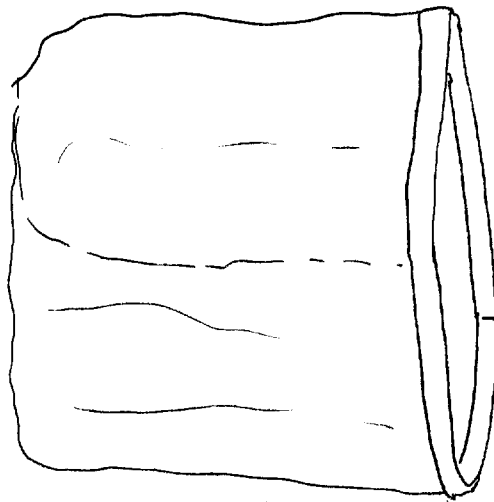

I saw a metal like cap which had a hollow portion to it. This cap had support braces in each corner.

There were other related aspects to the target which were similar to heavy canvas and wheels or circular objects.

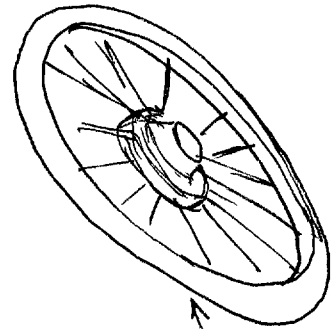

The object did not appear to be inside any structure -- it gave me the impression of suspension or being suspended. I did not see any people inside the object or around it. The purpose of the object was not determined in this session.
